False Allegations Against the Central Bank of Lesotho – Lesotho Tribune Newspaper

The Central Bank of Lesotho has noted with concern the unfortunate reports by the Lesotho Tribune Newspaper in its issue dated Sunday 01st December 2024.

In its article, “LSP Substandard Work Costs Central Bank Millions”, the newspaper associated the Bank’s recent pipe burst in its new building with corruption, incompetence, and cover-ups between the Bank and LSP Construction Company.

The Bank is shocked by these sensational, incorrect, and malicious attacks on its reputation as an institution. As a public institution accountable to its stakeholders, the Bank wishes to set the record straight that the water burst was a normal wear and tear incident, and wishes to assure the public that it has and will continue to deal with its business with trust, confidence, transparency, and integrity.
